

ContribYOUte gGmbH is a non-profit organization that has been committed to supporting smaller international organizations and their projects since December 2021. The focus of our work is to support and pass on donations to be able to realize the missions of our partners in Africa and Asia. Since February 2022 we have been supporting the “New delivery Car Project” of the Indonesian organization TLF (The learning farm). The work of the TLF, the mission to give hope and perspective to vulnerable young people, convinced us to enter a cooperation. The project was successfully completed in February 2024 with the purchase of the corresponding vehicle. By then we were able to carry out 5 donation transactions amounting to €2214.60 to contribute to the realization of the project. Through personal impressions on site at the beginning of 2024, we got to know the work of the organization, the structure and the benefits for everyone involved, as well as the appreciative transparency. We are proud and happy to have made our contribution within the cooperation and wish all TLF employees and students all the best and much success in realizing their mission.
